

# Presentation

¡Welcome to BitMinerX, your trusted partner in the world of Bitcoin!

## summary

The goal of the BitMinerX project is to create a self-sustaining company by and for investors. This is achieved through the expansion of the number of owned miners. The more miners BitMinerX owns, the higher the monthly profits for BMX token holders. The desired outcome is for investors' BTC wallet to grow safely and steadily as the company expands its number of miners. This goal is based on the idea that the more miners, the higher the mine's profit percentages, which, in turn, will reduce the number of BMX tokens in circulation.

## Problems and solutions

1. **High Energy Consumption:** Bitcoin mining is known for its high energy consumption. BitMinerX is located in Abu Dhabi, where electricity costs are low due to affordable power, making it more energy efficient. Access to Expensive
2. **Mining Equipment:** Acquiring and maintaining Bitcoin mining equipment can be expensive and complicated. BitMinerX allows investors to participate without the need to purchase or maintain this equipment, as the company takes care of the entire process, allowing investors to benefit from the revenue generated by BMX miners.
3. **High Competition and Centralization:** Bitcoin mining has become highly competitive and centralized in the hands of big players. BitMinerX seeks to distribute profits and control through the community of BMX holders, rather than relying on large entities.
4. **Maintenance Costs:** Investing in mining often involves significant maintenance costs. BitMinerX uses a portion of the profits to cover these costs and ensure that the mining equipment runs efficiently.  
**High Energy Consumption:** Bitcoin mining is known for its high energy consumption. BitMinerX is located in Abu Dhabi, where electricity costs are low due to affordable power, making it more energy efficient.

In summary, BitMinerX addresses some of the key challenges of Bitcoin mining by offering an alternative that is more energy-efficient, eliminates the need to purchase expensive equipment, provides a more stable approach to making profits, seeks a more equitable distribution of profits, and takes care of maintenance costs. However, it is important to remember that any investment carries risks, and investors are advised to fully research and understand the aspects before making financial decisions.

## Value Proposition

### Stand out from the crowd

1. **Access to Bitcoin Mining Without Investing in Equipment:** BitMinerX allows investors to participate in Bitcoin mining without the need to purchase and maintain expensive mining equipment. This removes the barrier to entry for those who want to profit from Bitcoin mining without the upfront investment in hardware and the complexity of managing it.
2. **Energy Efficiency and Low Electricity Costs:** By locating in Abu Dhabi, BitMinerX benefits from low electricity costs, making mining more energy efficient. This translates into higher returns for investors.
3. **Profit Distribution and Token Value (BMX):** BitMinerX uses a portion of the profits generated by mining to buy and burn its BMX token. Not only does this increase the value of the token, but it also distributes the profits to BMX holders using the smart contract's fee system, providing an additional source of income to investors.
4. **Continued Growth and Expansion:** BitMinerX aims to expand its mining infrastructure, resulting in a steady increase in profits for investors as more miners are added to the network. This contributes to the sustainable growth of investors' Bitcoin wallet.

BitMinerX's value proposition focuses on providing investors with easy access to Bitcoin mining, taking advantage of low electricity costs, distributing profits equitably through the burning of BMX tokens, and providing a more stable and less volatile alternative to making a profit in the crypto world.

## Make a Lasting Impact

In short, BitMinerX stands out commercially by offering an accessible, efficient, and less risky way to engage in Bitcoin mining, with a focus on profit distribution and sustainable growth. BMX's value proposition appeals to investors interested in making a profit in the crypto world without the hassle of buying and managing mining equipment.

En resumen, BitMinerX destaca comercialmente al ofrecer una forma accesible, eficiente y menos arriesgada de

1. **Exponential Profit Growth:** As more miners join the network, BitMinerX earning capacity increases exponentially. The more miners working on the platform, the higher the revenue generated, which translates into higher profits for investors.
2. **Increased Stability and Consistency:** The constant addition of miners contributes to greater stability and consistency in revenue. Downturns in the cryptocurrency market can be mitigated by the revenue generated by constant mining, providing a more predictable source of profit over time.
3. **Building a Hosting Farm:** BitMinerX's long-term goal is to own and operate its own mining infrastructure, a mining farm of its own. This will allow for greater control over resources and operating costs, resulting in greater efficiency and an even more equitable distribution of profits to investors.

In summary, BitMinerX's strategy of acquiring more miners over time contributes to steady and sustainable growth in profits, as well as greater stability in returns for investors. In addition, the goal of having a farm of its own reflects BitMinerX's commitment to strengthening its infrastructure and providing lasting value to its investors.

## Operation of Fees

The operation of BitMinerX (BMX) fees and burns is based on a system designed to increase the value of the BMX token and distribute profits equitably. Here's how they work:

**Transaction Fee (Tax) on Purchases and Sales:** BitMinerX charges a 5% fee on every BMX purchase, sale, or exchange. This fee is divided into two parts:

**2% in Bitcoin (BTCB Bep20) for BMX Holders:** Of the total 5% fee, 2% is distributed in Bitcoin (BTCB) to BMX holders. This means that if you own BMX and someone makes a transaction with BMX, you will get a portion of that fee in the form of Bitcoin (BTCB) as passive profit. This incentivizes BMX retention and rewards long-term investors.

**3% for BitMinerX Development:** The remaining 3% is used to fund the development and continued growth of BitMinerX. This includes the purchase of more mining equipment, advertising and marketing activities, as well as other operating expenses to improve the rig and infrastructure.

**BMX Token Burning:** A very interesting feature of BitMinerX is the burning of BMX tokens, this means that a portion of the profits generated by mining is used to buy BMX on the open market and these BMX tokens are removed from circulation by sending them to a walletDead. This strategy has two beneficial effects:

**Reduced circulating supply:** By sending BMX tokens to the walletdead, the total amount of tokens in circulation is reduced and this leads to greater token strength.

**Higher Value for Holders:** Purchases are made with capital from mining machines, as external capital entering the pool generates a rise in the price of the BMX token.

In short, BitMinerX fees are used to reward BMX holders in Bitcoin (BTCB) and fund the growth of the platform. The purchase and burning of BMX tokens aims to increase the price of the token and give solidity to the project. This system seeks to offer a more attractive and sustainable investment in the world of cryptocurrencies.

## Physical Functioning

BitMinerX machines generate yield by participating in mining, earning Bitcoin rewards for their work. As more machines join the network, performance and profits increase. Part of these earnings are used to buy and send to walletdead BMX tokens. In addition, a portion of the profits goes towards paying for electricity costs and equipment maintenance, ensuring efficient operation of the infrastructure and contributing to BMX's steady growth.

## Funding Round

BitMinerX was born as a community token and that is why we have decided that the financing round is aimed at the communities that have always been with us and its members are the ones who have priority access, but that does not mean we are going to leave out other interested people. So, if you want your place in this early round, stop by our Telegram, using this link [https://t.me/BitMinerX\\_General](https://t.me/BitMinerX_General) and talk to one of the Ceos.

# Tokenomics

The BitMinerX token has a maximum total supply of 100,000,000 BMX, this supply is distributed in 4 groups:

20% Financing round.

40% Presale on Pinksale launchpad or chosen platform.

20% Pool pancakeswap.

20% Reserved for team actions, airdrops, CEX listing, liquidity expansion, etc.

The price of the BMX token in the financing round is \$0.005 and the starting price on the launchpad will be 20% higher, \$0.006.

Tokens not sold in the financing round will be burned.

\*The numerical data may undergo some variation if the CEOs consider it so, but always without prejudice to the investor and seeking the best for the project.

## Tokenomics BMX

- PRIVATE
- PINKSALE
- PANCAKESWAP
- VOLUME/AIRDROPS

## Road Map

In BMX, we're not just building a project; we are creating a shared vision of greatness. Our roadmap is not simply a roadmap; is an invitation to join us on this exciting journey to success.

We want each of our holders to feel an integral part of our story, and that starts with total transparency and constant communication. The goal of our roadmap is not just to inform, but to inspire. We want you to see our vision for the project as clearly as we see it, so that together we can reach new heights.

# Etapas del Road Map

## Q3 (July – September 2023)

- Planning and structuring of the project.
- Management of commercial contacts necessary for development.

## Q4 (October – December 2023)

- Development of the website.
- Creation of channels on telegram and twiter.
- Private financing round.
- Start of pre-launch marketing.
- Presale on launchpad (Pinksale or similar).
- Purchase of the first machines and start-up as a pre-launch test.

### Q1 (January – March 2024)

- Intensification of pre-launch marketing.
- Launch of the BitMinerX BMX token.
- Post-launch marketing actions.
- Listed on CoinMarketCap y CoinGecko.
- Purchase of new mining machines to expand our mining power.

### Q2 (April – May 2024)

- Promote community growth.
- Acquisition of new mining machines.
- Creation of new business areas for the expansion of the project.

The roadmap will be updated, our goal is to have our own host to house our machines, which would make us even more profitable.

This roadmap reflects our commitment to transparency and sustainable growth. We are excited about the journey ahead towards building a strong community and realizing our dream of owning a mining farm. Together towards the future!
